

DARYL CECILE

I'm an ambitious Computer Science grad (2020) with over 2 years' experience building front and backend systems and maintaining responsive websites. I'm Proficient in HTML, CSS, C#, and JavaScript/Typescript, as well as a selection of modern libraries and frameworks, and have a passion for maintaining high level of efficiency and providing great user experiences

In terms of results and objectives, I am decisive and work with conviction in order to complete the tasks at hand, whether it is for community-related work, society-based projects, or work-related tasks.

Experience

Distinction Ltd | Software Engineer | Jul 2020 – Current

Work with clients across a wide range of domains, to create, maintain, and migrate their websites. As a software engineer at Distinction, I work mostly with Kentico CMS, C# (with .NET Framework), NodeJS, as well as the front-end technology stacks. I contributed towards the creation and release of a major client website, worked with clients to resolve issues and implement changes that lead to more efficient and stable products, and initiated process changes based on recommendations I made to simplify development and enable cost-saving. During my time at Distinction, I continue to upskill in Kentico, Pantheon, and Umbraco CMS.

ProjectFunction | Co-Founder / Tech Lead | Jul 2018 – Current

Create opportunities for people to learn and get into the tech industry by providing free courses to those who are under-represented in the field. I am in charge of creating and maintaining both the main website and the learning hub, as well as maintaining the database. I am able to make use of my knowledge of NodeJS, JavaScript, and EJS, when developing the site for ProjectFunction. As Tech lead, I am also the lead instructor, and deliver the core aspects of the courses that are run. This role also involves working with industry partners and sponsors, to negotiate and form collaborations.

ERT | Associate Software Developer | Aug 2018 – Jul 2019

I had the opportunity to work as part of the research and development team at ERT during a year-long placement where my duties included; feature design and implementation, as well as maintaining databases. Further to these, I was able to put my knowledge of JavaScript, C# and .NET to use in a larger scale product, while learning how to make these more efficient.

Code First: Girls | Coding Coach | Mar – Jun 2016

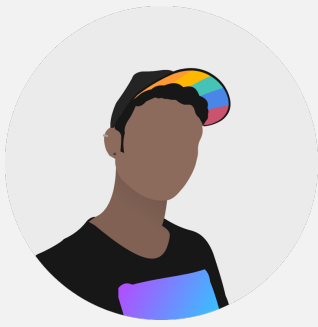

Worked as a team to provide coding assistance and mentorship to students aged 17+ with JavaScript, PHP, CSS, and HTML. Assisted students in acquiring skills to write efficient code, as well as providing implementation methods for their individual project ideas. In some cases, the individual has gone away to launch their start-ups, based on the ideas and guidance.

Just-Eat UK | Android Dev Intern | Sept 2015

Worked under the mentorship of the Head of Android Development Team on the Just-Eat Android mobile application. Learned about project management, scrum and sprints from the project manager, as well as shadowing the UI team during their proposal for the next campaign.

EC1 Spectrum Studios | IT Engineer | Jun – Jul 2012

Provided IT assistance to teaching staff and students. Deployed, set-up and configured digital instruments and software. This experience has also given me the chance to improve upon my C#, Java and PHP skills. In addition to the duties above, worked as part of the publication team to release digital advertisements, film, and record public interviews.

Education

BSc Computer Science

Nottingham Trent University | Sept 2016 – Aug 2020

- Computer Science Programming
- Internet Applications Programming
- Practical Project Management and Prof Development
- Information and Database Engineering

Language Skills

Programming languages:

My website was created from scratch and contains projects written in the following languages/frameworks:

- C#.NET
- NodeJS
- PHP
- SQL
- Java
- Kotlin
- JavaScript, HTML & CSS

Spoken languages:

I am multi-lingual and capable of speaking:

- English (Fluently)
- French (Bien)
- Spanish (Un Poco)
